Dispersant

RD-9315

Features and Advantages:

RD-9315 is a kind of polymer dispersant, widely used in solvent coating system. It has excellent grinding and dispersing effect on carbon black and organic pigment. Good versatility. It is widely used in oil-based ink paste production.

Product specifications:

Appearance	Yellowish brown liquid
Active ingredient	50±2%
Specific gravity	0.98g/cm³
Chroma (Gardner)	≤9
Boiling point	about105℃
Solvent	N-PAC

Application:

1.Disperse and grind carbon black and organic pigments in automotive paint, industrial paint, plastic paint and other systems.

2.In a variety of oily ink coating general color paste system dispersion grinding and organic pigments.

Recommended dosage:

Organic pigments	7-15%
Low surface carbon black	10-20%
High surface carbon black	40-80%

Application method:

Dissolve RD-9315 in the mixture of grinding base material first, then add pigment for grinding.

In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; For more information, please visit: https://www.rk-chem.com

Packing:

25/200 kg plastic drum.

Sorage:

Keep away from fire and light source and keep away from light.

Note:

Please evaluate carefully before use, suitable for matte furniture paint, also can be applied to bright light.
