

Softener

S-628

Features and advantages:

S-628 flexible agent is suitable for powder coatings of different systems.

1. Improve the impact resistance of powder coating
2. Improve the bending ductility of powder coating
3. Improve the wear resistance of powder coating
4. Improve the heat and salt spray resistance of the coating

Product specification:

appearance	Transparent granular
Flow velocity	25g/10 min
Fusing point	80°C
density	0.95g/cm ³
ingredient	Micropowdered modified polymer homopolymer

Addition amount and use method:

1. The addition amount of S-628 softening agent is generally 0.5-2%.
2. In the mixing stage, stir together with the makeup filler and extrude.

Packing: 25kg/bag (lined with polyethylene bag) 500kg/tray

Storage: It should be stored in a clean, ventilated and dry warehouse to avoid impurities
