

UV anti-graffiti aid

RT-3170

Features and advantages:

This product has a reactive active group, can form a chemical bond with the resin, so that the film surface to obtain hydrophobic, oleophobic, reduce dust, improve the film washing permanent effect. This product is also used to improve anti-graffiti, anti-paste performance. It is an organosilicon surface additive specially developed for easy cleaning coating system

- 1, excellent anti-graffiti, anti-sticking, peeling, smooth, scratch resistance.
- 2, good compatibility, leveling.
- 3, suitable for acrylic coating system, UV light curing coating system
- 4, similar to Digo 2700.

Product specification:

appearance	Light colored transparent to translucent liquid
Active ingredient	100%
Viscosity (25°C, mPa.S)	800-3200
ingredient	Special modified organosilicon compounds

Scope of application: UV paint, UV ink, solvent system, solvent-free system

Recommended dosage: 1-3% of the total formula

Usage: It can be added at any stage in the production process.

Packing: 25KG/ barrel, 200KG/ barrel.
