

Special defoamer for film adhesive

RP-6407

Features and advantages:

RP-6407 is a polyether modified fat defoamer, suitable for foam control of coatings, emulsion polymerization, white latex and adhesive, and the effect is long-lasting.

- It has excellent continuous anti-bubble effect and has very good compatibility.
- Strong versatility, can produce beautiful film.
- Strong compounding, not easy oil shrinkage, no adverse effect on the color of the coating.

Product Specifications:

appearance	Translucent colorless - light yellow viscous liquid
Active ingredient	100%
Specific gravity	0.89 g/ml
Ionic type	nonionic
Water solubility	Disperse in water, easily emulsified

Applications: laminated adhesive, white latex, pressure sensitive adhesive and other industries.

Usage and dosage: It can be added to the system in the form of the original,
