

Can be recoated silk screen fleshy feel additives

RT-3121

Features and advantages:

This product is a kind of surface fleshy feel agent, with the ability to increase the surface fine fleshy, improve the organic polymer mixing processing, leveling, mold release, gloss, heat resistance, cold resistance, weather resistance, and hydrolysis resistance. Keep the coating bright and give the film a smooth feel and good scratch resistance.

1. in the two-liquid two-component elastic paint system with excellent meat smooth feel
2. does not affect the coating surface silk screen recoating effect.
3. if you need a strong sense of flesh and hand smooth, you can choose RT-3123
4. with higher cost performance.

Product Specifications:

appearance	Transparent liquid
Active ingredient	100%
Viscosity (25°C, mPaS)	250-400.
ingredient	Polymer modified compound

Applications: thermoplastic acrylic system, polyurethane system, epoxy
