

Can be recoated silk screen feel aid

RT-3124

Features and advantages:

This product is a surface smooth feel agent, with the ability to increase the surface smoothness and fineness, and can be recoated screen printing to increase adhesion. The effect is remarkable. Can solve the rubber paint surface screen printing, recoating problems.

- In the two-liquid two-component elastic paint system has excellent soft feel, improve wear resistance, scratch resistance, prevent adhesion
- The scratch and wear resistance of the product is increased in PU matte paint.
- Improve the wear resistance of various coating products
- The effect of increasing the adhesion of surface recoating screen printing is remarkable

Product specification:

appearance	Transparent liquid
Active ingredient	100%
Viscosity (25°C ·mPa.s)	50-150.

ingredient	Polymer modified polydimethyloxane
------------	---------------------------------------

Applications: rubber paint, leather paint, baking paint, ink and paint with required hand feel

Recommended dosage: The recommended standard effective dosage is 1%, the usual dosage is about 0.5-2%, and the best dosage varies according to different formula requirements.

Usage: It can be directly added in the process of painting, or diluted with a suitable solvent to join the system, the best effect.

Packing: Net weight 25Kg/ barrel, 200kg/ barrel.
