## Anti-graffiti assistant

### RT-3149

#### Features and advantages:

Excellent resistance to marker wipe, anti-graffiti, anti-adhesion and hydrophobic, hydrophobic. For use in two-component systems (low temperature baking), it is recommended to use high hydroxyl content acrylic resin and extended baking time to improve marker wipe resistance. For use in varnishes, compatibility should be evaluated.

#### Product specifications:

appearance	Yellowish transparent liquid
Activity of	85%
ingredients	Hydroxy-functional agglomerated dimethylsiloxane

**Recommended dosage:** 0.6 -- 2.8% of total formula

**Packaging:** 25kg non-recycled plastic drum. The product is not completely used, the lid must be tightly closed after use.

**Storage:** keep away from heat and fire and keep away from light.
