

Polyethylene wax anti-settling agent

202P

Features and advantages:

1, is a polymer wax anti-settling agent, can be directly dispersed into the system, providing excellent anti-settling effect, does not affect the viscosity of the system.

2, it has no obvious effect on the gloss, yellowing resistance and drying speed of the paint film, and can improve the touch of the film.

3, it can be used without grinding, as a later addition, especially suitable for pigment pastes that can not be ground.

4, at the same time can help matte powder, aluminum silver powder in the direction of the paint film, especially suitable for matte paint, pearl paint, aluminum powder paint and other industrial coatings, wood paint and automotive paint.

Product specification:

appearance	White paste
Make up	Polyethylene wax
Effective portion	20%
solvent	aromatics

Application: industrial coatings, wood coatings, automotive coatings

Recommended dosage: Total formula 0.5-2.0% (Please test the most

appropriate dosage before use)

Usage: It can be added at any stage of the production process without grinding, but needs to be dispersed under high speed mixing.

Packaging: 50KG non-recyclable blue plastic drum; Before the product is fully used, the lid should be tightly closed after use.

Storage: Keep away from heat source, fire source and light.

Note: When 202P is used in aluminum powder paint, it should be dispersed in the resin and then added to the aluminum paste.
