

Polyester leveling agent

RF-7510

Features and advantages:

The leveling agent is silicone free recoating leveling agent, has good compatibility with the resin system, promote the coating system has good flow control and leveling characteristics, can effectively prevent shrinkage hole, pinhole, fisheye and other film defects, no adhesion between layers, excellent recoating.

Product specifications:

appearance	Light yellow liquid
solvent	DPM
composition	Polyester compound
The density of	1.02g/cm
Flash point	82°C
Solid content	50±2%

Application: Suitable for all oil coating systems

Recommended dosage: 0.5% to 3.0% of the total formula, the best dosage is 1.0% to 2.0%.

Usage: can be added in any process of production.

Packing: 25Kg/ drum, 200kg/ drum.
