

## Non-silicon defoamer

### RP-6300

#### Features and advantages:

1, with efficient anti-foam, anti-foam effect, wide versatility, does not contain solvents, suitable for low VOC system.

2, this defoamer has other types of defoamer can not match the defoamer effect, especially suitable for the primer defoamer, and does not affect the interlayer adhesion.

3, suitable for polyester, unsaturated polyester, epoxy, and light curing system;

#### Product specification:

appearance	Colorless to yellowish
Effective portion	100%
Make up	Vinyl polymer

#### Application field:

Solvent-based coatings; Photocurable coatings, solvent-free coatings.

#### Recommended dosage:

Total formula 0.1-0.5% (Please test the most appropriate amount before use)

#### How to use:

In order to obtain full defoaming effect, it is recommended to add before grinding. If added after, need to be at a high enough shear force Mix below to ensure defoaming effect.

**Packing:** 25KG blue drum not recycled.

---

**Storage:** Keep away from heat source, light source and away from light.
