

Water-based defoamer

RP-6904

Features and advantages:

RP-6904 is a highly efficient water-based defoamer with excellent miscibility, which can improve leveling and eliminate micro-bubbles in various water-based applications. Suitable for waterborne industrial varnish, waterborne wood paint, waterborne automotive paint.

- Eliminates microbubbles
- Suitable for spraying
- Suitable for high viscosity system

Product specification:

appearance	Cloudy liquid
Effective portion	100%
Chemical composition	Organosiloxane copolymer

Application field:

Brush/roll coating, airless spraying, compressed air spraying, flexo/gravure printing, dip coating, flow coating, spray coating, self-leveling

Recommended dosage: In the form of supply for the total formula: 0.1-0.5%

Instructions for use: Pre-diluted or directly added to the paint according to the supply form

Packing: 25KG, plastic drum

Storage: Store in unopened original packaging for use within 12 months
