

Dispersant

RD-9801

Features and advantages:

RD-9801 dispersant is the high polymer dispersant launched by the company for synthetic leather color paste, for carbon black has excellent grinding and dispersion performance and good color distribution, can improve the amount of carbon black in the formula, while the color paste still has low viscosity, good mobility and storage stability.

Product specification:

Appearance	Transparent liquid
Active ingredient	98±2%
Specific gravity	1.05g/cm ³
Colour (Gardner)	≤4
Boiling point	≥200℃

Application:

Used for preparation of solvent-based color paste of synthetic leather, grinding and dispersing carbon black.

Usage:

RD-9801 is directly dissolved in the mixture of grinding base material for grinding.

Packing:

Net weight 25Kg/ barrel, 200kg/ barrel.

Storage:

Keep away from high temperature and ignition sources;

Keep in a cool and ventilated place;

The shelf life is 24 months.
