

## Anti-flash rust agent

### RT-31391

#### Product features and advantages

RT-31391 is an environmentally friendly anti-flash rust agent free of VOC, nitrite and borate, with the same efficiency as its nitrite-containing counterparts, but without toxicity limitations. At the same time, it will not accelerate dry film corrosion, has no effect on other raw materials in the coating, and has a synergistic effect with anti-corrosion pigments.

#### Product parameter:

Appearance	liquid
Colour	Colorless to light yellow
PH value	8±1
Density (g/cm <sup>3</sup> )	1.08

#### Scope of application:

It is especially recommended as an anti-corrosion primer for iron, cast iron and steel surfaces. Soluble in water, alcohols and diols, insoluble in esters, aliphatic hydrocarbons and aromatic hydrocarbons, and compatible with most water-based raw materials.

#### Recommended dosage:

0.1-0.4% of the total formula

#### Usage:

Can be added at any stage of production.

#### Packing:

25kg/ barrel or 200kg/ barrel.

#### Storage:

Store in a dry, cool place. 1 year stability when not turned on at 25°C. Keep away from frost.
