

## Anti settling slurry

### 201P

#### Features and advantages:

1. It is a polymer wax anti-sedimentation agent, which can be directly dispersed into the system to provide excellent anti-sedimentation effect without affecting the viscosity of the system.
2. It has no obvious effect on the gloss, yellow resistance and drying speed of the film, and can improve the touch of the film.
3. It can be used as an additive without grinding, especially for pigment paste that can not be ground.
- 4, at the same time can help the matt powder, aluminum silver powder in the direction of the film, especially suitable for matte paint, pearlescent paint, aluminum powder paint and other industrial coatings, wood coatings and automotive coatings.

#### Product specifications:

Appearance	White paste
Make up	Polyethylene wax
Solid content	10% ± 1
Solvent	Aromatic hydrocarbon

#### Application:

industrial coatings, wood coatings, automotive coatings

#### Recommended dosage:

0.5-2.0% of total formula (please test the most appropriate dosage before use)

#### Usage:

can be added at any stage of the production process, no need for grinding, but need

to be dispersed under high speed agitation.

**Packaging:**

50KG non-recycled blue plastic bucket; Before the product is fully used, the lid should be tightly closed after use.

**Storage:**

keep away from heat and fire and keep away from light.

**Note:**

when 201P is used for aluminum powder paint, it should be dispersed in resin first, and then add aluminum paste.
