## Waterborne polyethylene wax emulsion

### S-4235

#### Performance and use:

1. It has a good anti-sticking effect
2. Play anti-friction, increase wear resistance, increase smoothness and gloss
3. Improve surface hydrophobic and anti-fouling performance
4. It has good anti-sinking effect

#### Product specification:

Model number	S-4235
appearance	Yellowish emulsion
ingredient	Polyethylene wax
Wax liquid system	nonionic
Melting point °C	105
Solid inclusion	35±2%
PH	6-8

Apply	S-4235 wax emulsion is suitable for all kinds of leather finishing agent, textile printing paste, water-based wood paint, water-based latex paint, water-based adhesive, water-based release agent
Additive amount	1-5%

**Packing specification:** 50kg plastic drum packing
